BEST WESTERN INN
5978 GLOVER ROAD**

November 26-27, 2008

**RICHMOND, BC
BEST WESTERN INN
9260 BRIDGEPORT ROAD**

In partnership with

The Concrete Flatwork Finisher certification is given to a craftsman who has demonstrated (through experience and/or performance) the ability to place, consolidate, finish, edge, joint, cure and protect concrete flatwork.

The Concrete Flatwork Technician certification is given to a person who is knowledgeable about proper procedures to place, consolidate, finish, edge, joint, cure and protect concrete flatwork, but who lacks sufficient work experience to qualify for full flatwork finisher status.

Materials & Program

In advance of the course, each participant will receive a Craftsman Workbook for ACI Certification of Concrete Flatwork Technician / Finisher.

There will be a full-day lecture covering the course material to prepare the participants for a two-hour written examination the following morning. Exams are graded by the ACI Certification Department. ACI will grant a 5-year Concrete Flatwork Technician certification to those examinees who obtain a passing grade of 70% on the written exam.

Individuals with Flatwork Technician certification can upgrade to full Flatwork Finisher status upon submittal and approval of sufficient work experience and/or successful completion of the ACI performance evaluation. Performance affidavit forms will be provided to be signed by current and/or previous employers verifying the applicants proven abilities. Performance evaluation by appointment at additional cost.

Program cost includes course materials, exam and certification. Coffee, lunch and refreshments will be served on first day of course.
